**Art and English Language Development**

With the adoption of the Common Core State Standards (CCSS), K–12 educators have new responsibilities. The Common Core Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects mandate that all teachers emphasize student development of skills that lead to a mastery of what is commonly referred to as “academic language.” Educators of all grade levels and in all content areas have, in effect, become literacy teachers. The expectation is that students, ELL (English-language learners) and non-ELL, will complete assignments using standard English, with appropriate use of the specialized vocabulary for each content area.

Under the CCSS, challenges facing teachers with English-language learners are greater than before. Students struggling to master the rudiments of English are expected to develop skills to utilize the English of academic language in each subject area. As language-skills specialists have long known, the lasting acquisition of specialized vocabulary is dependent on first mastering the concepts being introduced. An older approach to developing the language skills of ELL students is to assign them vocabulary lists to memorize. New research suggests that this is not the best approach under CCSS, in which the understanding of concepts (not just word memorization) is key. This research also indicates that use of art, and images in general, can be tools to achieve success.

The role of images in promoting language literacy is not new, but it is now commonly believed to be of critical importance. The background pedagogy and theory are based on research that is best explained in more detail, but in simplified form, the approach is to use visual materials to facilitate active discussion among students. Initially, such discussion can be held in students’ “everyday language” (using the English skills and vocabulary they have mastered thus far). As they continue their discussions about the images and ideas, always referring back to what they see, their discussion solidifies their comprehension—in English—of the concepts being introduced. Classroom teachers facilitating the discussions can deepen students’ levels of understanding as they move these discussions forward. Once the concepts are mastered via discussion, the more specialized vocabulary of that content area can be introduced.

The information contained in this packet references objects from the permanent collection of the Los Angeles County Museum of Art (LACMA), and also includes a variety of classroom activities to engage students in discussion. Exercises that promote careful looking and the exchange of perspectives provide active and engaging learning experiences, as well as build students’ confidence in their oral skills. These competencies can carry over to written work. The museum’s collection—nearly all of which is easily available online at www.lacma.org—can be used for topics of discussion in many different content areas; and lesson plans can be adapted to the use of images from myriad formats.
SEATED DOG

Japan, Edo period (1603–1868), c. 1680
Kakiemon ware, porcelain with overglaze enamels
24.1 x 22.9 x 12.7 cm (9 ½ x 9 x 5 in.)
LACMA, Robert and Mary Looker (PG.2011.12)
Photo © 2013 Museum Associates/LACMA
What is not to like about this dog? A new Lacma acquisition, Seated Dog is sure to be popular with children and adults. Clearly a canine, its playful decoration is both amusing and attention-grabbing. Children on school tours are likely to immediately identify with it, many perhaps wondering what it is doing in a museum: Is it old? Why is it decorated with those bold, colorful splotches? Who made it, and why? It clearly is an object well suited as a subject for lively discussion.

Though it looks as though it could have been created recently, Seated Dog is actually several hundred years old. It was created in the Kakiemon workshops in Arita, in southern Japan, in the late seventeenth century. Kakiemon porcelain is named after the pioneering work done by Sakaida Kakiemon (1596–1666), who is credited with the successful creation of overglaze enamels on porcelain. To make this object, first the dog's body was made, with the high-quality ceramic known as porcelain, and then coated with a beautiful clear glaze, or coating, made of a thinned version of the ceramic material. After firing in the kiln at a high temperature, the dog would have been cooled and then decorated with splashes of enamel (metallic pigment mixed with powdered glass), before going back into the kiln and being fired again, this time at a lower temperature, which was needed to "fire" the enamel.

According to museum curators, this dog was made in about 1680. Its spots suggest it might be a Dalmation, which is not a breed native to Japan. Kakiemon porcelains were highly prized possessions of European royalty and aristocracy in the late 1600s and early 1700s, and were produced more for export than local use. While spots on a Dalmation are typically black, here colorful enamel glazes were used to showcase the Kakiemon technique, as well as to emphasize the fine white-porcelain background.

**Graphic Organizers:** What do you know about this work of art? What do you wonder? When selecting works of art for English language instruction, consider representational works with easily-recognizable images, such as animals. Start with what students know about the work and scaffold in subject area content during the course of the conversation. Use a graphic organizer to record the discussion, documenting student responses through words and pictures. The additive approach is accessible because it activates and builds on students’ prior knowledge and experience. It also makes student thinking visible for the group and encourages deeper inquiry at the individual level. Try the approach when introducing a new topic in order to identify what students already know. Revisit the same artwork and approach later in the school year to evaluate student progress and the depth of student responses over time.

CARLOS MÉRIDA
Guatemala, 1891–1984, active Mexico
Structural Study for a Mural (Estudio estructural para mural), 1921
Oil on canvas, 73. x 83.2 cm (28 3/4 x 32 1/4 in.)
© Carlos Mérida Estate, Photo © 2013 Museum Associates/LACMA
According to LACMA curators, *Structural Study for a Mural (Estudio estructural para mural)* is one of Carlos Mérida’s most accomplished early works. Mérida was born in Guatemala, but he moved to Mexico in 1919 and spent most of his career there. While living in Paris before that, from 1912 to 1914, he met a number of avant-garde artists, including Pablo Picasso and Mexican artist Diego Rivera. Upon his return to Guatemala in 1914, Mérida studied his native country’s art traditions and folklore, which he believed could serve as the basis for a higher art, one equal to the work he had seen in Europe. Mérida was able to incorporate his deep understanding of pre-Columbian art and the result was an aesthetic that transcended national boundaries.

The simplified shapes and bold patches of color in this mural study show the strong influence of art created before the Spanish conquest of the New World (which began in the late fifteenth century). Among these characteristics are geometric abstraction, from the art of the ancient Maya peoples; use of flat colors; and emphasis on human forms. This mural study is universal in its depiction of people and family groups, yet it is also culturally specific, which resonates in particular with museum visitors familiar with Latin American cultural traditions.

**Word Sort:** What do you see in this work of art? What more can you find? Take an inventory of student findings using a word bank, then reflect on the discussion by sorting responses according to pre-determined categories (based on the lesson objective). The process of recording and organizing student thinking elucidates parallels between everyday and academic descriptions. It offers a comprehensible approach to vocabulary development and fosters practice with both English and the language of the visual arts. Use the elements of art as the word sort categories to introduce the terms line, shape, and color.

MILLARD SHEETS
United States, 1907–1989
Angels Flight, 1931
Oil on canvas, 127.6 x 101.6 cm (50¼ x 40 in.)
LACMA, Gift of Mrs. L. M. Maitland (32.17)
© Millard Sheets Estate, Photo © 2013 Museum Associates/LACMA
This painting by Los Angeles—area artist Millard Sheets, who led a circle of twentieth-century Southern California artists known as Regionalists or American Scene painters, depicts an early-1930s downtown—Los Angeles scene: the top of the well-known landmark, Bunker Hill. The vantage point is from above; the figures look down along the path of a stairway mounting the slope. Bunker Hill could be ascended by climbing a series of steps and ramps, or by riding on the incline railroad Angels Flight (still at work today, but in a different form). Sheets did not include the railway in his painting, though photographs of the site suggest that the women in the foreground might be standing on the platform at the railway terminus.

While Sheets’s body of work actually concentrated more on rural California, this scene gave him the opportunity to follow his impulse to paint his immediate surroundings, including the city. A big influence for Sheets and his contemporaries was the New York—based Ashcan School, a group of artists who advocated painting scenes of the rapidly urbanized East Coast cities, showing residents at work and at play.

Another favorite in museum school tours, Angels Flight offers arrays of both scenic perspectives and people—of many ages, engaged in different activities, and wearing various types of clothing. Any of these aspects or scenarios will invite close examination and elicit discussion. Students are likely to immediately recognize the painting as an urban scene, though its large Victorian homes and apartments that once populated downtown Los Angeles were torn down long ago.

Sentence Frames: If you were a person in this painting, what would you hear? What would you see, smell, and feel? Consider approaching a work of art from the viewpoint of a person, an object, or even a building. Immersive prompts allow students to try on different roles, to evaluate different perspectives, and to experience the “environment” created by a work of art. Sentence frames can help students synthesize their thinking and identify new understandings discovered through the process of perspective-taking. They also model proper grammar and syntax for students, while managing the (often negative) emotions that arise for ELL students when writing about works of art. This strategy reduces anxiety, and increases self-esteem and motivation.

“I think the women are feeling . . . because . . .”

“Imagines the laundry could think. I think the clothes would be thinking . . . because . . .”

“Imagine the billboard could talk. I think the billboard is saying . . . because . . .”
ROYAL PEACOCK BARGE
Murshidabad, West Bengal, India, late 19th century
Ivory, 61.9 x 106.7 x 16.5 cm (24 3/8 x 42 x 6 1/2 in.)
LACMA, Gift of Cynthia and Ken Boettcher, Laguna Niguel, California (M.82.154)
Photo © 2013 Museum Associates/LACMA
Viewing this ivory barge provides many opportunities for student discussion. Identifying its numerous details—from the guns mounted on the barge’s front to the elephants on its base supporting the vessel’s weight—instigates close examination and contributes many jumping-off points for conversation.

There is a long and rich history of ivory carving in India. Over the course of its millennia of artistic expression, several natural sources of ivory, antler, and bone have been utilized to create a wide variety of objects. The largest Indian carved-ivory objects—sometimes made from an entire tusk and more—are ivory boats like this one. They were made during the late nineteenth and early twentieth centuries in Murshidabad, the great Bengali center of ivory carving, in what is now northeast India.

Among these depictions of vessels are ivory models of royal pleasure boats, called peacock barges (mayūra-pankhī or morpankhī), because their prows were shaped in the form of a peacock. These boats were used by the governor (nawāb) of Bengal and his guests during festivals on the Ganges river, and the ivory models, made in varying sizes, portray the elaborate peacock barges in detail. They typically feature, as this one does, one or two covered pavilions in the forward section, which were used for entertaining the ruler and his guests and housed musicians, dancers, and a communal pipe (hookah.) A number of servants also are often in attendance, including one whose job was to pull the cord of the swinging ceiling fan (pankhā). The stern is occupied by several pairs of rowers and a helmsman.

**Group Work:** What is one detail that you see in this work of art? What is one detail that your partner noticed that you did not?

"Think/pair/share" prompts give students the opportunity to practice listening and speaking skills in an intimate setting. Even when a partner speaks on behalf of a student to the larger group, the student’s voice is honored and recognized through paraphrase and summary. Consider a "four square" activity that encourages students to join a small group based on their reaction to a work of art. Assign a different statement to each corner, such as:

1. I like this work of art.
2. I do not like this work of art.
3. There are things that I like and do not like about this work of art.
4. I would change this work of art.

Or try "numbered heads together," by assigning each student in a small group a number and proposing a question, such as "What is one similarity or difference between these two works of art?" Call, at random, on student number one or student number four to report findings back to the larger group. Equal voicing activities such as these foster communication, giving students the opportunity to make individual contributions through group collaboration.
Classroom Activity

Origami Bookmaking

Enduring Understanding
Artists and authors use sketchbooks to record observations and ideas.

Grades
K–2

Time
One class period

Art Concepts
Line, shape, form, paper-folding techniques

Literacy Concepts
Describing, questioning, expressing likes and understandings

Materials
Heavy cardstock (8 ½ x 11 in.), regular paper (8 x 10 ½ in.), origami paper (3 ½ in. & 4 ½ in. squares), stretchy cord, colored pencils, and glue sticks

Talking about Art
View and discuss the printed image of Seated Dog (late 17th century).

What do you see? What do you know about this artwork? This artwork represents a dog, and dogs are happy and playful animals. Think of a dog that you have met before. Describe the dog’s characteristics and actions. Dogs are curious and excited. They like to run, jump, and explore new things. How would you describe the artwork Seated Dog? This dog is happy because he is smiling. His curvy tail says that he is curious. His front paws look as if he is ready to pounce.

What do you wonder about this artwork? Questions about this work might include, "Is this artwork old or new?,” “How was this artwork made?,” and "Why did the artist give the dog colored spots?" This artwork was probably made in the year 1680. It was created using a special clay called porcelain. First, the artist studied the 2D lines and shapes of the dog (curvy, straight, or wiggly) then captured the 3D form of the dog in a clay. Next, the artist painted the clay form in a clear glaze and fired (or baked) the clay in a kiln (or oven). After the clay hardened and cooled, the artist painted the dog’s spots in colored enamel and fired the form again. The painted spots suggest that this dog might be a Dalmatian, and the artist’s choice of colors give the Dalmatian an imaginative look.

Making Art
Transform simple paper into a 3D animal form using origami (or paper-folding) techniques. First, create a book by folding a sheet of cardstock in half. Select four to five sheets of regular paper to serve as the inside pages. Lay the pages on top of each other, fold the sheets in half, and insert the pages into the book cover. Open the book to the center page. Measure a 17.5 in.-long piece of stretchy chord. Pull the two chord ends together and tie in an overhand knot. Wrap the circular stretchy cord around the book’s center fold to create the binding.
Next, create an origami dog to decorate the book cover. Select a 3 ½ in. square origami sheet. Use the following steps to create the head:

1. Fold
2. Fold
3. Draw

Then, select a 4 ½ in. square origami sheet. Use the following steps to create the body. Glue the head and body together, and adhere to the cover of the book:

1. Fold
2. Fold
3. Glue

Reflection

What do you like about this artwork and why? What did you learn about this artwork? Artists find inspiration in nature and in animals. Artists incorporate adjectives and actions into their animal works. Animal artworks can look realistic and imaginative. Simple 2D materials can be transformed into 3D animal forms.

Curriculum Connection

Compare this dog with other dogs from LACMA’s permanent collection, or select complementary literary texts, such as books about dog, cat, or bird characters. Ask students to record their findings about animal artworks and stories in their origami books. Students can chart learning and progress by returning to these questions, "What I know about this artwork (or book)," "What I wonder about this artwork (or book)," and "What I learned about this artwork (or book)."

For a classroom worksheet related to this activity, as well as a selection of animal images from LACMA’s permanent collection, see "Lesson Plans & Resources" on the curriculum CD.

Classroom Activity

Collage Storytelling

Enduring Understanding

Just as authors use words to compose sentences, artists use the elements of art to compose images.

Grades

3–5

Time

One to two class periods

Art Concepts

Line, shape, color, horizon, composition, character, action, setting

Literacy Concepts

Identifying, retelling, sequencing, planning and predicting

Materials

Construction paper, regular paper (large sheets such as 18 x 24 in.), colored pencils, scissors, and gluesticks

Talking about Art

View and discuss the printed image of Structural Study for a Mural (Estudio estructural para mural) (1921).

What words do you think of when you look at this work of art? Ask students to record thoughts in writing and drawing, using words and pictures to describe what they see. Create a classroom word bank by combining students’ words, or by ask students to write or draw their words and pictures on the board.

How would you categorize these words? As a group activity, sort the classroom word bank according to predetermined categories, such line, shape, and color. These categories will fold in vocabulary terms related to the elements of art.

<table>
<thead>
<tr>
<th>LINE</th>
<th>SHAPE</th>
<th>COLOR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Swirly</td>
<td>Circle</td>
<td>Yellow</td>
</tr>
<tr>
<td>Curvy</td>
<td>Triangle</td>
<td>Brown</td>
</tr>
<tr>
<td>Straight</td>
<td>Oval</td>
<td>Blue</td>
</tr>
<tr>
<td>Zig-zag</td>
<td>Rectangle</td>
<td>Black</td>
</tr>
</tbody>
</table>

What story is the artist telling? Conduct a second word bank focused on storytelling and sort the words according to the parts of a story.

<table>
<thead>
<tr>
<th>CHARACTER</th>
<th>ACTION</th>
<th>SETTING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Woman</td>
<td>Sitting</td>

<td>Leaf</td>
</tr>
<tr>
<td>Baby</td>
<td>Kneeling</td>
<td>Bowl</td>
</tr>
<tr>
<td>Mother</td>
<td>Carrying</td>
<td>Wallpaper</td>
</tr>
</tbody>
</table>
What might happen next in this story? Imagine that this artwork represents a "Before" scene. What clues did the artist give you to help predict what happens "After?" Ask students to act out different possibilities, using their bodies and movement to create visual predictions. Ask students to plan and chart their predictions according to character, action, and setting.

**Making Art**

Use collage techniques to test your prediction. First, cut an assortment of lines and shapes out of construction paper, pulling inspiration from the lines and shapes depicted in the artwork. Use a large sheet of paper as the background and draw a horizon line using a colored pencil.

Then, "retell" the scene by arranging and layering the lines and shapes as they appear in the work.

Next, rearrange the lines and shapes. Use the lines and shapes to depict what happens in the next scene.

When you have reached a desired composition, glue the shapes to the background. Lastly, enhance the scene by adding color, words, or captions with colored pencils.

**Reflection**

Pair up and share your artwork with a partner. Choose one of your artworks to act out together and write a short sentence to accompany the scene. Share your action and movement with the rest of the class in an art-inspired performance. Ask students to predict the accompanying caption, then reveal your sentence to the class.

**Curriculum Connection**

Expand on the lesson by incorporating a literary text. Choose one scene from the text. Who are the characters, what action is happening, and where does the setting take place? What clues did the author give you to predict what happens next? Discuss the differential use of written and visual foreshadowing.

For a classroom worksheet related to this activity, see "Lesson Plans & Resources" on the curriculum CD.

<tr>
<td><strong>Talking about Art</strong></td>
<td>Take a moment to study the printed image of Angel's Flight (1931).</td>
</tr>
</tbody>
</table>

What do you see? What is happening in this picture? Two women look downhill. They see people climbing steps to reach the hilltop. The area is populated by many people, buildings, and objects. It is an urban area with residential and commercial buildings. The sun peeks over a rooftop, and you can almost hear the noise that fills this space.

What do you see that makes you say that? People are looking at each other. They are standing and sitting in rocking chairs as they converse. One person is emerging from a doorway as if to call out to someone. The people ascending the hill use canes to help them walk.

What more can you find? This painting depicts a 1930s view of Angel's Flight, the downtown Los Angeles landmark. Although the artist does not include the railway in the composition, he offers an array of scenic perspectives, including the large Victorian homes and apartments that once populated Bunker Hill.

The above questions form an inquiry-based facilitation approach called Visual Thinking Strategies. "What do you see," or "What is going on in this picture?," encourages close looking. "What do you see that makes you say that?" requires students to ground their observations in the artwork and to use visual evidence to support their claims. "What more can we find?" reminds students that there is always more to look at and talk about in the work of art.

As the facilitator, the educator should paraphrase students' comments to ensure that students are heard and to model proper use of language for the group. Insert vocabulary during the process of paraphrasing to introduce and reinforce terms, concepts, and ideas related to the lesson's objective. As students voice comments, point to the place in the artwork that the students are referring to. By pointing, the content of the comments are anchored in the imagery of the artwork.
Writing about Art

If you were a person in this painting, what would you hear? What would you see, smell, and feel? Try on different roles, evaluate different perspectives, and immerse yourself in the “environment” created by this work of art. Have pairs of students approach this work of art from the viewpoint of a person, an object, or even a building, using the following sentence frames:

"We think the women are feeling ... because ...
"We think the laundry is thinking ... because ...
"We think the billboard is saying ... because ...

Ask students to share their sentences frames with the class by writing them on the board. Have students classify details discovered in the painting using these sentence frames:

"We organized the ... by ...
"You can group these together because ...
"... is a part of this group because ...

Lastly, ask students to respond to their classmates’ statements by expressing agreements and disagreements using these sentence frames:

"We agree with ... however ...
"We disagree with ... however ...
"We think ... were ... when they said ...

Reflection

How has your understanding of this artwork changed? Encourage students to synthesize their thinking and identify new understandings by individually responding to these reflection statements:

"I used to think ... but now I think ...
"The more I think about this artwork, I realize ...
"I believe the artist is trying to say that ...

Curriculum Connection

Select an informational text that relates to themes that emerged from Angel’s Flight, such as articles about population, urbanization, or development. Encourage the transfer of content and critical thinking skills by asking students to compare the artwork with the text. Suggested sentence frames for response may include:

"Based on what I read, I believe ...
"Even though it does not say so in the text, I think ...
"I suppose the author is trying to say that ...

For a classroom worksheet related to this activity, see "Lesson Plans & Resources" on the curriculum CD.
EXPLAINING THE SCENE

We think the women are feeling ______________________ because ________________________________.

We think the laundry is thinking ______________________ because ________________________________.

We think the billboard is saying ______________________ because ________________________________.

CLASSIFYING THE DETAILS

We organized the __________________ by ________________________________.

You can group these together because ________________________________.

_____________________________ is a part of this group because ________________________________.

AGREEING/DISAGREEING WITH OTHERS

We agree with ______________________ however ________________________________.

We disagree with ______________________ however ________________________________.

We think ______________________ were ______________________ when they said ______________________.
Classroom Activity

Summarizing Ideas

Enduring Understanding
One artwork can be filled with a world of ideas.

Grades
9–12

Time
One class period

Art Concepts
Material, technique, inspiration, detail, purpose, time, movement, pattern

Literacy Concepts
Evaluating, summarizing, expressing a position

Materials
Paper and pencils

Writing about Art
Take a moment to study the printed image of Royal Peacock Barge (late 19th century).

Ask students to select one “art idea” to respond to in writing. Ideas may include: material (what the artwork is made of), technique (how the artwork was made), inspiration (what the artist was thinking), detail (things that describe the artwork), purpose (why the artwork was made), time (when the artwork was made), movement (where your eye goes), and pattern (things that repeat in the artwork). Have students free write about this idea while studying the artwork. They can respond using a combination of drawing and writing. Ideally students should write without stopping for several minutes, focused on their ideas first and not worrying about grammar, spelling, or punctuation.

When finished, ask students to read over what they have written. Next, students should choose one word or phrase that summarizes the ideas that they expressed in their writing. If they included the word or phrase in their writing, they may circle it.

Talking about Art
Divide the class into small working groups. Ask students to share the words that they chose with their group members. They should also provide a brief explanation as to why they chose the word and what makes the word important to their understanding of the artwork. Encourage them to elaborate on the word by sharing additional observations about the artwork.

Take a break and return to the artwork. Spend another moment quietly studying what you see. Now that you have had a second look at the artwork, what do you notice that you did not notice before? Turn back to your group members and discuss the details that went unnoticed, such as the elaborate patterns that adorn the barge, the elephant figures that support the vessel’s base, the people conversing under the canopy, or the placement of the barge to evoke movement.
After considering the perspectives of your peers, what new word or phrase summarizes your small group conversation?

Gather as a class and ask a representative from each group to share their new word or phrase. They should also share why they feel the word summarizes the small group’s understanding of the artwork.

**Reflection**

What questions are you left with about this work of art? Questions may arise about the material—ivory. This work speaks to a long and rich history of ivory carving in India. Over the course of its millennia of artistic expression, several natural sources of ivory, antler, and bone have been utilized to create a wide variety of objects.

Why did the artist create a boat? The largest Indian carved-ivory objects—sometimes made from an entire tusk or more—are ivory boats like this one. They were made during the late 19th and early 20th centuries in Murshidabad, the great Bengali center of ivory carving, in what is now northeast India. These celebratory boats were used by the governor of Bengal and his guests during festivals on the Ganges river.

**Curriculum Connection**

Allow student interests to direct research about this artwork and time period. What were these boats used for? What is the significance of the boat image? What rivers or bodies of water border the country of India? What natural resources are native to this part of the world? Fold in art and social studies vocabulary and concepts to support students’ directed research.

For a classroom worksheet related to this activity, see "Lesson Plans & Resources" on the curriculum CD.
